OPPCOM PARTNERS WITH NETCHEMISTRY TO BUILD THE FIRST EVER WEB-BASED CLAIMS MANAGEMENT PLATFORM

NEWPORT BEACH, Calif., November 1, 2004 - NetChemistry, a top-tier provider of mission-critical, highly secure software to the Financial and Health Services Sector, today announced that OPPCOM Systems has successfully launched the first ever web-based claims management platform built on NetChemistry's Core Product Suite.

"NetChemistry's Core Product Suite allowed OPPCOM to move from idea to production system in an affordable, accelerated time frame with tried and tested reliability," said James Oppenheim, CEO of OPPCOM Systems. "It will definitely allow us to service our clients easier, faster and with less liability."

"Our goal has always been to help startup companies more affordably access and manage new technology," said Chris Cruttenden, president of NetChemistry. "NetChemistry's Core Product Suite allows rapid system implementations which can be rapidly customized to fit each client's unique business parameters."

At every employer, when an injury occurs, someone is designated to start the work comp claim. The 5020, better known as the notice of first report, is the first document that is processed. This document is very old and antiquated. It is not designed to take advantage of the vast changes in communication in just the last decade. For example the form has no field for e-mail, cell phone numbers, or even fax numbers. Communication is one of the most crucial components in making the difference between losing control of a claim and getting the injured employee back to work. Creating accountability is just one of the missing ingredients in our currently crippled and archaic workers compensation system.

At OPPCOM we designed our system to be very user friendly. For example the 5020 form is resident on our web site, along with vast amounts of information that is utilized during the entire work comp process. The system is designed to be completely paperless. No more running around looking for your work comp claims kit. OPPCOM Systems is dedicated to improve the current workers compensation system in California to encourage businesses to stay in California rather than moving their operations to a different state or even out of the country. It is the belief of many that California business owners are fed up with the current system and is looking for change. We have the answers.

About the Core Product Suite

NetChemistry's Core Product Suite allows for rapid system implementations with an emphasis on security, availability, distribution and tracking of secure information. Our seasoned software modules that facilitate processes common to all web-based applications are overlaid with productized industry-specific managers and then finished with client-specific requirements.

About OPPCOM Systems

OPPCOM Systems is a specialty workers' compensation claims management company whose objective is simple: To minimize fraud, and to get legitimately injured employees back to work as soon as possible. In addition OPPCOM Systems will thwart the abuse of the work comp system by many doctors and lawyers. Our system is revolutionary, it

incorporates systems, methods, procedures, quality control, and accountability all achieved by utilization of the World Wide Web. At OPPCOM, we employ an oversight mentality to keep an eye on the parties that are manipulating the system for their own benefits.

About NetChemistry

NetChemistry is an Internet solution and software provider for the Financial and Health Services industry whose systems have handled billions of dollars in transactions. Combining vertical expertise with their Core Product Suite, NetChemistry specializes in Web-based information enrollment, distribution and tracking systems comprised of secure, scalable software modules that can be rapidly customized to fit the different parameters of each clients offering. The modules are designed to improve customer relationships resulting in efficiency, convenience and reduced liability.

In addition to software development, NetChemistry has a comprehensive understanding of design architecture, systems integration and provides a complete hosting solution at the tier one SBC facility in Southern California.
