### NETCHEMISTRY HAS RELEASED ITS MUCH ANTICIPATED AUTHMED SOFTWARE SOLUTION FOR MEDICAL ENROLLMENT AND ELIGIBILITY DETERMINATION

NEWPORT BEACH, Calif., January 2, 2006 - NetChemistry, a top-tier provider of mission-critical, highly secure software to the Healthcare and Financial Services Sector, today announced the release of AuthMED a streamlined and automated web-based enrollment and eligibility determination System.

Aimed primarily at the Healthcare services sector, AuthMED provides a simple and seamless way for organizations to manage new applicants by qualifying them according to a predetermined criteria, tracking their status and managing their electronically stored information online.

#### How IT Works

AuthMED is a web-based software solution that uses a single point of data entry for multiple state and/or county run health programs. As the data is entered, the system performs routine error checks and provides immediate feed back when a required field is incomplete or data is incorrectly entered.

Once an application is completed, AuthMed will store all the information in its database. Applications can then be assigned according to language and or workload. Once an application has been assigned, a supervisor can monitor workloads and applications in progress.

Social Services can drill down to an enrollee's application and obtain a detailed view of the verification work list. This enables one or multiple workers to keep track of an applications progress for quicker approvals. Once an application has been submitted - the eligibility status is available to hospitals and clinics 24/7 through the AuthMED verification site.

#### About NetChemistry

NetChemistry is an Internet solution and software provider for the Financial and Health Services industry whose systems have handled billions of dollars in transactions. Combining vertical expertise with their Core Product Suite, NetChemistry specializes in Web-based information enrollment, distribution and tracking systems comprised of secure, scalable software modules that can be rapidly customized to fit the different parameters of each clients offering. The modules are designed to improve customer relationships resulting in efficiency, convenience and reduced liability.

In addition to software development, NetChemistry has a comprehensive understanding of design architecture, systems integration and provides a complete hosting solution at the tier one SBC facility in Southern California. For more information on NetChemistry or its services, contact NetChemistry at 4600 Campus Drive, Suite 201A, Newport Beach, Calif., 92660; phone: (949) 399-5380; or visit [www.netchemistry.com](http://www.netchemistry.com).
