## ORANGE COUNTY LAUNCHES CLINIC CONNECT AN ELECTRONIC REFERRAL SYSTEM CONNECTING 32 FACILITIES

ER providers now have the ability to electronically refer indigent patients to participating community clinics for follow up visits.

NEWPORT BEACH, CA, March 29, 2007 – NetChemistry in conjunction with ELM Technologies, today announced that the Orange County Health Care Agency (OCHCA) has successfully linked 24 major hospitals and 8 Community Clinics in Orange County, CA through the Clinic Connect/ER Connect platform

ER Connect allows ED physicians across Orange County to instantly access MSI patient information at the point of care. Built with the input of ED Physicians, ER Connect can retrieve and display a patient’s prior ED visits/hospitalizations, prescription history, referrals, prior diagnosis, and case management notes. ED Physicians can also share notes on individual patients in real time.

Clinic Connect provides Community Clinics the ability to accept electronic referrals from EDs via ER Connect in real-time. Clinic Connect can also retrieve and display a patient’s prior ED visits/hospitalizations, Clinic visits, prescription history, referrals, prior diagnosis, and case management notes. Clinic physicians can share notes on individual patients in real time with both the ED as well as other Community Clinics.

“Our goal is to arm all Physicians who come in contact with the uninsured with as much pertinent patient information as is available to enhance their ability to treat the patient at the ‘point of care’,” said Dan Castillo, MSI Program Manager.

Clinic Connect is one element of the five-year vision adopted by Orange County and its hospitals to stem over-utilization of hospital emergency departments for non-acute services as well as the inefficient use of medical services in the MSI program. The five-year vision is focused on increasing the quality of life and well being of the Indigent patient, by enhancing the use of technology to manage the patient’s activity within the Orange County health care system.

### About MSI

The Medical Services for Indigents (MSI) division of the Health Care Agency acts as a payer to hospitals, clinics, physicians, ambulance companies, home health providers, and other providers that serve eligible indigent patients. Through contracts with hospitals throughout Orange County, MSI administers the MSI Program for necessary medical care to county responsible patients. MSI also administers separate, non-mandated indigent medical services programs. Medical services are provided countywide.

### About Clinic Connect

Clinic Connect aggregates disparate patient information throughout the healthcare community to ensure that ED physicians and Community Clinics have the critical information needed in emergent and referral situations. The patient information is organized and displayed through a web-based platform that integrates easily into any ED or Clinic process flow, requiring little or no training. Key data elements typically include

prescription history, laboratory diagnostic results, past emergency department visits, past hospitalizations and claims-based outpatient history.

#### About NetChemistry

NetChemistry is an Internet solution and software provider for the Financial and Health Services industry whose systems have handled billions of dollars in transactions. Combining vertical expertise with their Core Product Suite, NetChemistry specializes in Web-based information enrollment, distribution and tracking systems comprised of secure, scalable software modules that can be rapidly customized to fit the different parameters of each clients offering. The modules are designed to improve customer relationships resulting in efficiency, convenience and reduced liability.

In addition to software development, NetChemistry has a comprehensive understanding of design architecture, systems integration and provides a complete hosting solution at the tier IV AT&T facility in Southern California. For more information on NetChemistry or its services, contact NetChemistry at 4600 Campus Drive, Suite 101, Newport Beach, CA 92660; phone: (949) 399-5380; or visit [www.netchemistry.com](http://www.netchemistry.com).
