NETCHEMISTRY IS AWARDED THE ELECTRONIC ENROLLMENT AND ELIGIBILITY CONTRACT FOR SAN DIEGO'S COUNTY MEDICAL SERVICES (CMS), PROGRAM

NEWPORT BEACH, Calif., September 27, 2007 - NetChemistry, a top-tier provider of mission-critical, highly secure software to the Health Services Sector, today announced that they have been contracted by San Diego's Health and Human Services Agency (HHSA) to implement AuthMed, a web-based paperless enrollment and eligibility determination platform.

The County Medical Services (CMS) Program provides necessary medical services for San Diego County residents aged 21 through 64 years, who have no financial resources for medical care and meet prescribed income limits and other eligibility criteria. Eligible individuals can receive primary care, hospital emergency and inpatient care, and medically necessary approved medical services and medications. In fiscal Year 2006-07, the CMS Program provided care to approximately 17,600 certified eligible individuals for a program cost of approximately \$67 Million.

"Electronic enrollment and eligibility determination are the cornerstones to improving access to healthcare," said Chris Cruttenden, President of NetChemistry.

CMS processes approximately 40,000 paper applications per year. In order to streamline the eligibility process, HHSA's CMS Program has contracted NetChemistry to implement AuthMed their Electronic Eligibility System. The AuthMed System will eliminate some of the current paper processes and increase timeliness in determining eligibility for patients. In addition, the system will automatically send eligibility notices to patients, and electronically transfer eligibility data to HHSA's Fiscal Intermediary, AmeriChoice. The new system will allow for electronic storage of all patient demographic data, and enhanced reporting mechanisms needed by the CMS Program. Care providers will have 24/7 online access into an applicant's eligibility through AuthMed's Provider Online Verification (POV) website.

About AuthMed

NetChemistry's AuthMed is a web-based enrollment and eligibility determination platform. A simple and seamless way for organizations to manage new applicants by qualifying them according to predetermined criteria, tracking their status and managing their electronically stored information online.

About CMS

The County Medical Services (CMS) program was initiated in 1983 to help uninsured adult county residents get medical care. CMS is not a health insurance program. Funded solely by local dollars, CMS assists medically indigent adults who are not eligible for other governmental health care programs.

About NetChemistry

NetChemistry is an Internet solution and software provider for the Financial and Health Services industry whose systems have handled billions of dollars in transactions. Combining vertical expertise with their Core Product Suite, NetChemistry specializes in Web-based information enrollment, distribution and tracking systems comprised of secure, scalable software modules that can be rapidly customized to fit the different

parameters of each clients offering. The modules are designed to improve customer relationships resulting in efficiency, convenience and reduced liability.

In addition to software development, NetChemistry has a comprehensive understanding of design architecture, systems integration and provides a complete hosting solution at the tier one SBC facility in Southern California. For more information on NetChemistry or its services, contact NetChemistry at 4600 Campus Drive, Suite 201A, Newport Beach, Calif., 92660; phone: (949) 399-5380; or visit www.netchemistry.com.
